Gsite 2.0

Next Generation Digital Construction Management

Gsite 2.0 is a centralised, integrated digital platform that connects stakeholders, boosts efficiency, reduces costs and risks, and fosters organisational growth.

Albin Sigvardsson, Supervisor in MVB Öst AB

“Gsite simplifies our security rounds and minimizes the need for administration as we can easily export finished protocols, saving us valuable time otherwise spent on administration.”

Needs

Executives

Manage risks and make sure finances are stable

Project Managers

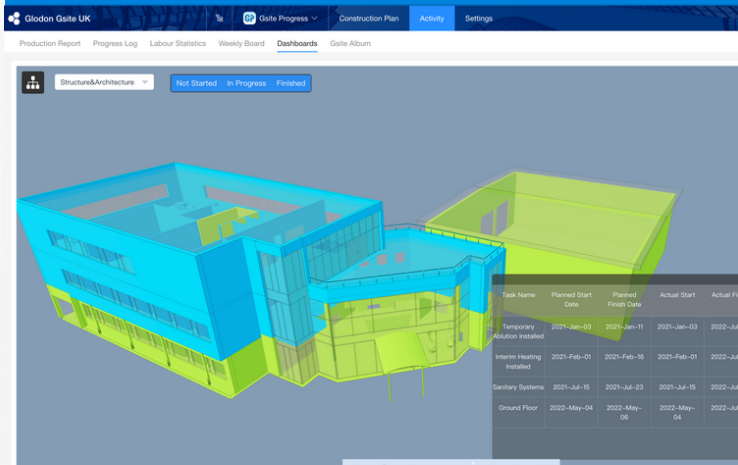

Ensure projects are completed on time and within budget

Field Professionals

Complete assigned tasks efficiently and to the required standards

Features

- ISO 19650 compliant- Drawings & Models
