

# Building Better with Gsite 2.0

A centralised, integrated digital platform that connects stakeholders, boosts efficiency, reduces costs and risks, and fosters organisational growth.

## Next Generation Digital Construction Management

- 
- BIM - Enabled
  - ISO 19650 - Compliant
  - RFI, Site Diaries management
  - Mobile app for remote collaboration
  - Centralised issues, checklists, documents, models

With over 10 million users and 6 million completed projects worldwide, Glodon keeps developing advanced and integrated digital building platform solutions for the entire construction lifecycle.

## Gsite 2.0 – Create Value for all Stakeholders

### Executives

Manage risks and make sure finances are stable

- Boost Financial Performance
- Mitigate Project Risks
- Data Driven Actionable Insights
- Gain a Competitive Advantage

### Project Managers

Ensure projects are completed on time and within budget

- Streamlined Coordination
- Improve Quality Assurance
- Coordinated Document Management
- Health & Safety First

### Field Professionals

Complete assigned tasks efficiently and to the required standards

- Efficient Time and Task Management
- Enhanced Communication
- Automated Safety Notification
- Skills Development

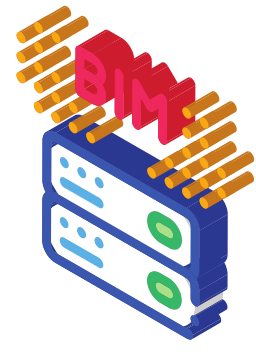

Gsite simplifies our security rounds and minimizes the need for administration as we can easily export finished protocols, saving us valuable time otherwise spent on administration.

Albin Sigvardsson, Supervisor at MVB ★★★★★

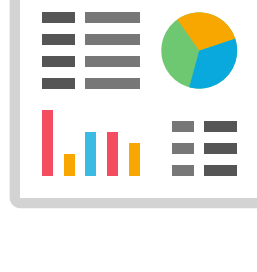

## Core Development Focus for Gsite 2.0

**01 – Design Management**  
Improve design document accessibility and data accuracy and provide an effective workflow for stakeholders.

### 02 – Optimised Dashboards

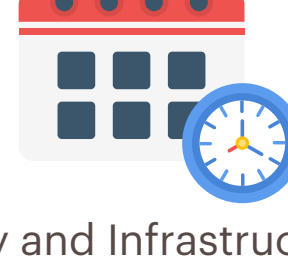

Harness data for analysis and insights via our customisable project and management-level dashboards

**03 – Streamlined On-Site Collaboration**  
Enhance collaboration with linked data, actions, visualisation, and insights.

### 04 – Advanced Resource Scheduling and Management

Equip project teams with real-time updates and automated conflict resolution.

**05 – Core Product Technology and Infrastructure**  
Open-API platform providing a unified UI, customisation, and interoperability.

### 06 – Innovation First

Offer users the latest in technology advancements with AI, 360-degree cameras, and Intelligent Construction Site capabilities.

**07 – UK Based Cloud Server**  
GDPR compliance, and project and personal data protection.
